

Amazon Firestick – AFTV v6

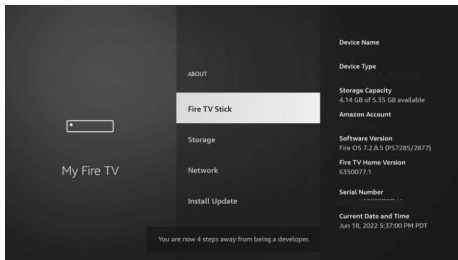

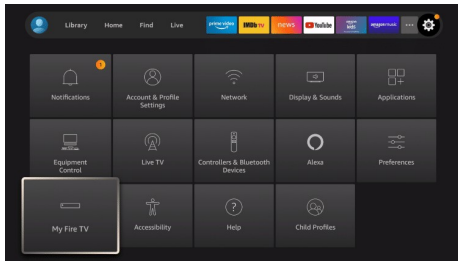

Make sure the stick has your Amazon account and an internet connection. Make sure you have installed all updates by going into settings (the COG at the end)

1-INSTALL DOWNLOADER

See this page for instructions **ONLY** and also see the video for instructions;

<https://troypoint.com/how-to-jailbreak-a-firestick/>

Open magnifying glass (FIND) go down, and type DOW and go down to DOWNLOADER and install the APP. **DO NOT OPEN THE APP.** Using the same (FIND) load VLC for Fire TV and SurfShark, Award VPN or Purple VPN.

2-SET DEVELOPER OPTIONS

You need to set developer options and allow ADB, click on the Settings COG at the right of the APP list. Click on My Fire TV and About, click on Fire TV 7 times to open developer options, go back one screen and open Developer Options. Turn on Allow content from unknown sources too. Go down one to DOWNLOADER and set to ON.

www.media16.eu

Please see media16.eu for instructions on VPN use. See the above website for service news and help.

3-INSTALL TV APPS

Go to ALL APPS and open DOWNLOADER click Allow to access data,

To download the latest APK enter 1844069 in the downloader box click on GO and follow the instructions, you may need to go back into settings and allow unknown sources DOWNLOADER. You may need to go into the files section to find the download click on it to INSTALL. You can delete the installation file once installed.

See the Media 16 Sheet to load the APP and enter your account details. **Once installed you will need to contact me by email for your account details.**

4-CONFIGURE APPS

Once loaded, go to the apps page, icon nest to the settings cog with three boxes and a plus, press OK and find Media 16, press and hold OK, move the icon to the top row left and press OK.

5-GENERAL SETTINGS

Please ensure when you are finished watching IPTV you exit the program by pressing the return key until you are back at the main menu.

6-PLAYER SELECTION

Go to settings on Media 16, open EXTERNAL PLAYERS and ADD PLAYER, select VLC and load it.

If you want to turn off subtitles, when the software is loaded, and you can see the LIVE TV MOVIES and SERVICE click on the COG left bottom or right top and go into GENERAL SETTINGS. Make sure Active Subtitle is not checked.

You cannot use Voice Search with Media 16 unless you have a screen keyboard showing, you need to open the APP and navigate using the OK and cursor buttons.
